

Reduce your water consumption Energy saving

Make your network sectorized analysis
and reveal high consumption areas

Clamp-on ultrasonic flowmeter TIME DELTA-C advanced type

Easy and Low-cost installation

No piping work and no need to interrupt the plant operation

Maintenance free

Non-contact technology with no risk of leakage

Measurement data you can trust

High accuracy & fast response time

Line balancing and efficiency optimization

Thermal energy balanced sheet

Collect, analyse, and optimize

Communication function available

Free configuration and data management software

Maximum flexibility and wide range of applications

Independent of fluid nature, pressure, and temperature

Built to last in harsh industrial environments

Robust & waterproof design
